Subject: Notice of Public Meeting for NextEra's East Durham Wind Project
Attachments: Notice-EDPublicMeeting_10242012.pdf

As required by the Ontario Regulation 359/09, please find attached the notice for the next public meeting for NextEra's East Durham Wind Project.

In response to our previous correspondence on this project Alex Trandafilovski (Land Use Specialist, Aeronautical Information Services
NAV CANADA)

you had requested more information about this project, specifically that we complete a spreadsheet with the following data:

- geographical coordinates for all turbines
- maximum turbine height for all turbines (hub + blade at 12 o'clock position)
- ground elevations for every turbine
- 50K topographical map clearly indicating the location of each proposed turbine

We should now be in a position to provide the requested information and will forward that to you shortly.
